Background of the Invention –;

Revise Page 2, line 20- Page 3, line 4 to read as follows:

– Summary of the Invention

The goal of the invention is therefore to modify a system ~~according to  
the species as presented in Claim 1~~ in such a way ~~as~~ to provide a sensitive and  
precise adjustment of the rotating cam in the system.

According to the invention, the goal is achieved by the combination of  
features ~~herein of Claim 1~~. To this end, both the rotating cams as well as the limit  
switches are combined into one constructional unit. This complete unit is preferably  
able to be inserted or clipped on, this enabling easy installation. In many cases, it  
is able to be easily removed, appropriately adjusted, and then moved to its  
operating position. As a result, the corresponding rotating cams are able to be  
adjusted extremely precisely.

Advantageous embodiments of the invention ~~based on the main claim~~  
are described ~~herein in the following subclaims~~. –;

Page 4, between lines 2 and 3 insert – Brief Description of the  
Drawings –; and

between lines 8 and 9 insert – Description of the Preferred  
Embodiments –.
